

C++11:

jueves, 12 de mayo de 2022 07:03 a. m.

→ through messages

two types of communication:

1) One thread to One thread, one time : `h.join()` → between main thread and 1 thread h

2) ∞ to ∞ threads, ∞ times

→ Pass a pointer so that we can 'return' a value in a thread function

→ Future Promise
